

## Request to Connect with a Current ISU Student

The Program for Women in Science and Engineering has access to a list of all ISU female students who are majoring in a science, technology, engineering or math-related majors at ISU. If you would like us to help identify a university student from your community who might be able to meet up with your group on conference day, please email the following information to [trlt@iastate.edu](mailto:trlt@iastate.edu) at least seven working days before the conference:

- Lead teacher name as listed on your registration form
- School name
- Date your group will be attending the conference
- Name of your town and other nearby communities
- Phone number and email at which you could be contacted by the ISU student

**Process** If we receive a request, we will search for a student from your community. We will then send an email to that student explaining your interest in connecting while your group is on campus. This email will provide the ISU student with your contact information. (We can not release their information to you without their prior approval.). We will ask the student to contact you directly about their availability/interest. We can not guarantee that you will be able to meet up with a current ISU student from your community, but we will certainly try to facilitate such a connection.
